▶ EDUCATION

Bachelor of Philosophy with a major in Information Architecture with a focus on Web Editor - Back End Web Developer
University of Boras (2018 ~ 2023)
Information architecture is the main area of the program and the education provided a broad foundation as fundamental problems regarding the design of effective web-based information enviroments.

- I got to learn problems around organization, structuring, search and navigation in we-based information enviroments, where usability and accessibility are central concepts.
- What I have done is create a website with a fictitious client and then a completely new website with a real client. The website was designed according to the client's target groups.
- I have built a database and created and integrated with APIs. During the education, I also had the opportunity to learn programming languages in both front-end and back-end development. I have decided to focus on back-end development, but my goal is to become a fullstack developer.

High school studies with a technical focus
Vettergymnasiet in Jonkoping (2013-2016)
High school diploma in the electricitty and energy program; computer and communication technology.

- Have studied e.g. web server programming,
- and web development,
- microcomputer technology, electronics, electromechanics etc.

▶ EXPERIENCE

RETIREMENT HOME
Hammargardens AB, Jonkoping (2022.06 - 2023.01)
